**Report of phenol peel for Asians.**

Yoon E S; Ahn D S

Division of Plastic and Reconstructive Surgery at Korea University, Seoul.  
Plastic and reconstructive surgery ( UNITED STATES ) Jan 1999 , 103 (1) p207-14;

With the advancement of trichloroacetic acid peel technology and wound care, trichloroacetic acid peeling has become very successful in Korea. Its success has opened studies on the possibility of using phenol on Korean skin. Dr. Mee's phenol formula (molding mask technique) was chosen for experiments on Korean skin because of the presumed safety of use on non-Caucasian skin. Between January of 1996 and January of 1998, 30 cases of significant small pox scars were treated with phenol at the Korea University Anam Hospital. The age range was from 43 to 60 years, with a mean of 49 years. The average follow-up period was 13 months, ranging from 1 month to 2 years. All of the procedures were performed in the operating room while the patient was under deep i.v. sedation. After the entire face was peeled, it was covered with an occlusive tape mask. During the recovery period, the patients underwent a post-peel skin care program. All 30 patients showed significant improvement of the severe pox marks with a marked rejuvenation effect. There was no sign of hypopigmentation or hyperpigmentation. As a complication, two patients developed hypertrophic scars on the perioral area, which responded well to steroid injections. Another pair of patients had herpetic infection, which left minimal scarring. Five patients developed cardiac arrhythmia with this rapid technique, but this was safely managed by an anesthesiologist during the procedure. Korean skin belongs to Fitzpatrick types IV and V and occasionally to type III or VI. It is common knowledge that performing chemical peeling on the latter types of skin is dangerous, but in this report, excellent results were obtained from all 30 patients, even though the peeling itself was very deep. With more knowledge and experience, phenol peel can be safely conducted on Asian skin.

BACKGROUND: Conventional submental tumescent liposuction has proved disappointing for some patients with anterior neck laxity, ptotic platysma muscles, and increased subplatysmal fat. Many of these patients are facelift candidates but are unwilling to undergo this extensive procedure. We describe our hybrid approach, which offers consistently improved results and enhanced patient satisfaction. OBJECTIVE: To establish

a sharper cervicomental angle by more completely removing subplatysmal fat. We also wished to achieve more consistent, smoother results, minimizing ripples, folds, and hematomas with a novel postoperative dressing system. METHODS: Extensive tumescent liposuction of the lower **face**, jowls, and anterior neck was performed. Following this, subplatysmal fat was removed by dissection, the platysma muscle was imbricated, and the CO2 laser utilized in a defocused, low-power mode to partially treat the dermal undersurface and underlying muscle. Our postoperative dressing included a 10 cm mineral **oil** polymer gel disc in the submental location, covered by **tape**, silicone foam, and a lower **face** and neck garment to provide both support and even compression over the entire neck for at least the first 24 hours. RESULTS: Results proved uniformly satisfying for most patients, even those in their senior years. Benefits included an improved cervicomental angle, a decrease in jowling, and a marked reduction in the laxity and wrinkling of the neck skin and horizontal neck creases. Problems related to postoperative rippling or folding of the redraped skin and hematoma formation were minimized. conclusion. Laser neck tightening combined with tumescent liposuction and an advanced postoperative dressing for superior support and uniform compression has resulted in consistently excellent outcomes with improved patient satisfaction.

AB Skin care compns. and methods are provided for improving the appearance of skin affected by aging, photodamage and/or oxidative stress. Specifically, \*\*\*adhesive\*\*\* materials contg. cosmetically active ingredients, e.g., one or more antioxidants such as vitamins A, C and/or E, or \*\*\*moisturizers\*\*\* are applied in concd. dry powd. form to target areas including the frown-line area of the forehead, the front of the neck, the crows-feet area near the eyes, the upper lip and the nasolabial area using a transdermal \*\*\*patch\*\*\* having an acidity of human skin acidity (.apprx. 5.5), preferably by an appropriate ratio of ascorbic acid and ascorbate salts. A silicone pressure-sensitive \*\*\*adhesive\*\*\* was prepd. by condensing 66 parts of a 70 % xylene soln. of a polysiloxane, 31 parts of a hydroxyl-terminated polydimethylsiloxane (viscosity of .apprx.13,500 cP at 25.degree.) and 2 parts of xylene, at 115-120.degree. in the presence of 0.025 parts anhyd. ammonia. The mixt. was heated to 140.degree. for 1 h to remove any excess ammonia. The silicone \*\*\*adhesive\*\*\* mass was then mixed with an equal wt. of ascorbic acid. The \*\*\*adhesive\*\*\* solns. were coated onto a fluoropolymer-coated release liner. This silicone pressure-sensitive \*\*\*adhesive\*\*\* was found to have an adhesion of 268 g/cm at a thickness of 1-2 mils on a mylar backing.

DT Report  
LA English  
AB Due to new technologies, magic ingredients like Retinol, Glycolic Acid and AHAs are common knowledge to most consumers. The trend today in anti-aging advances is toward natural plant, vegetal, herbal and marine plant extracts. The focus in skincare is on fighting the ravages of time and preventing the effects of aging on the skin. Anti-aging products help to recapture the texture and appearance of youthful skin. After such more general statements, the report includes descriptions of anti-aging products in the market place. Clarins offers a complete line of anti-aging products all described as Extra Firming. One new outstanding treatment in the line is "Extra Firming Skin Supplement Double Serum 38," which contains 38 key natural ingredients. Shiseido recently introduced "Facial Lifting Complex" to help redefine **facial** contours. Orlane has a new line called "B21 Bio-Energic." Many other companies offer product lines to combat aging. L'Or al's Pl nitude is a regimen for women of the age of 50+; "Age Perfect" is L'Or al's new anti-aging product. From Almay, there is "Kinetin Skincare " available, a new advanced anti-aging series, comprised of seven products. One of Est e Lauder's advanced product is "Prescriptive's Super Line Preventer," and Est e Lauder's "Resilience Lift" is a new, special, **\*\*\*emollient\*\*\*** **\*\*\*cream\*\*\*** which combats the severe dryness that occurs in the natural aging process of women's skin due to hormonal changes. New from Clinique is "Stop Signs," an anti-aging serum to fight **\*\*\*wrinkles\*\*\***, fine lines, mottled **\*\*\*patches\*\*\*** and discolorations. Lanc me recently introduced "Absolue," a breakthrough in skin technology, to repair damage from chronological aging, hormonal fluctuation and photo-aging. Also from Lanc me is "Renergie Lift Contour," a skin firming and contouring complex, with a special massage technique for application. Yves St. Laurent has developed an avant-garde "Anti- **\*\*\*Wrinkle\*\*\*** **\*\*\*Cream\*\*\*** Lisse Expert." Ella Bach also from France introduced "Radical Rides," as the ultimate preventive, **\*\*\*wrinkle\*\*\*** -halting treatment for women over 30. "Rich Cr me" is an anti- **\*\*\*wrinkle\*\*\*** treatment collection, created already in 1973 by Yves Rocher Laboratories. And SkinCeuticals Inc. recently introduced "Primacy," the next generation in anti-oxidant skincare. Although Americans are getting older the market for anti-aging skincare products is growing for another reason - women like natural products and use them earlier and younger

AB New topically applied treatments for structurally deteriorated or otherwise aged skin are shown by comparative skin-thickening data to effect structural improvements in the deteriorated skin. The disclosed treatments disrupt the skin's water barrier and elevate trans-epidermal moisture loss (TEML) for extended periods of weeks or months and include methods of mech. or solvent action, e.g. **\*\*\*tape\*\*\*** stripping or acetone washes. Preferred treatments use cosmetic **\*\*\*creams\*\*\*** or gels with active ingredients such as lactic acid as a primary water-sol. barrier disruption agent, a retinoid (e.g. vitamin A palmitate) as a lipid-sol. barrier disruption agent, and a particular cerebroside to inhibit barrier repair. Such novel **\*\*\*creams\*\*\*** or gels can be applied daily for extended periods to provide chronic, sustained disruption of the barrier as indicated by significantly elevated TEML. Thus, a mild compn. suitable for **\*\*\*facial\*\*\*** application contained cetearyl alc. plus ceteareth-20 3.50, GMS-PEG 100 stearate 3.50, PEG-100 stearate 2.00, dimethicone 5.00, capric triglyceride 4.00, mineral oil 6.00, propylparaben 0.10, vitamin A palmitate 1.00, water 45.00, glycerin 5.00, butylene glycol 6.00, Carbomer 941 0.20, methylparaben 0.25, triethanolamine 3.10, lactic acid 5.00, cerebroside 1 and 2 (from bovine brain) 0.15, green tea polyphenols 5.00, fragrance, and water to 100.00%.

AB NeoSkin is a new line of skin care **\*\*\*patches\*\*\***, a brand of LecTec Corp., Minnetonka, MN, USA. LecTec has been involved in many skin delivery **\*\*\*patches\*\*\***, such as acne **\*\*\*patches\*\*\*** for Johnson & Johnson's Neutrogena and Clean & Clear brands, as well as health-related **\*\*\*patches\*\*\*** to alleviate cold sores, sore muscles, fever blisters, corns, psoriasis and cold discomforts. Many of its products are alternatives to oral medications or ointments and **\*\*\*creams\*\*\***. NeoSkin **\*\*\*patches\*\*\*** deliver a cooling sensation to the skin. The line includes super- **\*\*\*hydrating\*\*\*** at-home skin treatments such as the Pre-Formed Moisture mask, **\*\*\*Hydrating\*\*\*** Eye Gel **\*\*\*patches\*\*\***, and Cucumber Eye & **\*\*\*Face\*\*\*** pads. The NeoSkin line was launched

in Feb. 2002 and products will retail for US\$8.99 in beauty outlets and mass and rug stores in the U.S

...ingredients are more suited to delivery via a patch than others -- and sometimes a cream is a more suitable vehicle.

Gatineau (EPB/Revlon) included a "masque patch" in its Feminessence range which was first introduced in France in February 1997. In this instance these were adhesive patches for use on problem zones -- the forehead, upper lip and eye contour. Feminessence is a five-product range for menopausal women, or women who are either about to or have just undergone the menopause. Feminessence Patch Mask is distributed in perfumeries, department stores and beauty salons. The company also has patches for the bust which are only available as a beauty salon treatment. The Feminessence patch is made of an adhesive support impregnated with active ingredients: apple seed extract, avocado oil , AHAs, maize protein, calendula and allantoin. They should be applied for 30 minutes, once a week for five weeks. A spokesperson for Gatineau comments that...

**Glicolift Anti-Wrinkle Patch - Facial Kit; Lip Zone Treatment; Eye Zone Treatment**

( Zena Cosmetics has introduced the Glicolift Anti-Wrinkle Patch that delivers active ingredients via a timed release transdermal technique in the UK )

International Product Alert , v 14 , n 5 , p N/A

March 03, 1997

Word Count: 118

**TEXT:**

Utilizing the skin care properties of plant collagen and glycolic acid, Zena Cosmetics (UK) Ltd. has developed Glicolift, an **Anti-Wrinkle Patch** that delivers active ingredients via a timed release transdermal technique. A Facial Kit that contains 24 patches, enough for three full treatments, is priced at 29.95 English pounds. Also available are Lip Zone Treatment (6-patch **pack**) and Eye Zone Treatment (12-patch **pack**). The retail price for either product is 14.95 English pounds. According to trade literature from the United Kingdom, the soft, contoured patches are made with **adhesive** backs that facilitate application and have been developed without the use of animal testing or animal-derived ingredients. For sample retrieval information, please call: Marketing Intelligence Service, Ltd., (716) 374-6326.

**TEXT:**

Tarrytown, NY-based SAS Group, Inc. is the distributor of Re-Nu Transdermal Antiwrinkle Patches. Company literature describes Re-Nu as "a new, soft, contoured **adhesive** transdermal patch for the treatment of **wrinkles**." Claimed to gradually and uniformly deliver to the skin a unique blend of **oils**, antioxidants, exfoliates and **emollients** , the patches are "hypoallergenic, fragrance free" and have "no preservatives." The Eye Zone patches are sold in a 6-count box that states, "Control the appearance of aging with alpha hydroxy acid, beta hydroxy acid (and) collagenic plant protein." Sold in 3-count packages are Upper Lip Zone, Forehead Zone and Neck Zone varieties. For sample retrieval information, please call: Marketing Intelligence Service, Ltd., (716) 374-6326.

**Yardley goes into receivership.**

European Cosmetic Markets , 397(1)

Oct 1 , 1998

**Text:**

UK: In late August it was announced that Old Bond Street Holding Company Ltd and seven of its subsidiaries, including Yardley, had been placed in receivership. KPMG was appointed as the receivers. Yardley's ultimate owners, through Old Bond Street, are US investment bank, Wasserstein Perella Management Partners. The Yardley group was said to be suffering from a heavy debt burden following its change of ownership in the early 1990s, when it was sold by SmithKline Beecham to Old Bond Street. A report in UK broadsheet, the Financial Times stated that the last posted figures for Old Bond Street Holding Company showed pre-tax losses of (pounds)9.2mn on sales of (pounds)69mn in 1996, after losses of (pounds)2mn the year before. The company's debts were said to stand at (pounds)120mn. The group has 300 employees, a manufacturing operation based in Basildon, UK, a head office in Central London and operations in Australia, New Zealand, Malaysia and Singapore. It also has major customers and distribution arrangements in several other countries.

Founded in 1770, Yardley is strong in the "English Perfumery" sector of the market and draws heavily on its heritage. However, in recent times, Yardley had attempted to reinvent itself, revamping its colour cosmetics line and appointing Linda Evangelista as its spokesmodel.

As ECM went to press, a spokesperson for KPMG stated that around 100 expressions of interests had been received and a number of frontrunners had since emerged. Serious negotiations were to start in mid-September, with a final sale of the whole concern expected shortly after.

Gatineau (EPB/Revlon) included a "**masque** patch" in its Feminessence range which was first introduced in France in February 1997.

In this instance these were **adhesive** patches for use on problem zones - the forehead, upper lip and eye contour. Feminessence is a five-product range for menopausal women, or women who are either about to or have just undergone the menopause. Feminessence Patch **Mask** is distributed in perfumeries, department stores and **beauty** salons. The company also has patches for the bust which are only available as a **beauty** salon treatment. The Feminessence patch is made of an **adhesive** support impregnated with active ingredients: apple seed extract, avocado **oil**, AHAs, maize protein, calendula and allantoin. They should be applied for 30 minutes, once a week for five weeks. A spokesperson for Gatineau comments that although patches will be used more over the coming years, for both medical and cosmetic purposes, they expect them to remain a niche product. The fact that patches do not provide a softening, smoothing layer and that consumers do not feel anything on their skin is cited as their main disadvantage.

...delivery (TDD) system for pharmaceuticals. Drug patches deliver drugs into the dermis and beyond, whereas, cosmetic patches allow only cosmetic actives to penetrate the epidermis.

Cosmetic patches have been used commercially for acne and blemish reduction. They consist of a piece of soft cloth, tissue or adhesive **tape** impregnated with **cosmetic** actives (emollients, moisturizers or papers sprayed with foundation pigments or encapsulated fragrances). These are packaged individually. A patch is placed on the affected area of the skin for some time in order to be effective. This concept involves soaking or bombarding the localized skin with highly concentrated solution of **emollients** and **moisturizers** including **cosmetic** actives. The solvent/liquid mixture must be cooling, refreshing, pleasant and non-irritating.

Impregnated tissue or paper must be gently rubbed onto the **face** in order to refurbish the makeup. An adhesive-type **cosmetic** patch can be used for the slow release of actives overnight. Other types provide temporary relief for extreme skin dryness. This concept can be utilized effectively on a localized area of the skin to apply a **cream**, liquid or mud **mask** containing treatment actives.

Cosmetic Packaging

Delivery of cosmetics is as important as the product itself. There are two interesting packaging concepts. Aerosol has created Aerosol...

TEXT:

The Secret Lift Kit from CosmeSearch, Inc. of Solana Beach, CA, is promoted in magazines as offering **cosmetic** surgery results without the pain and expense. The tag line is, "Instant **facelift**, or your money back! No surgery, no chemical peels, no miracle **creams**, no gimmick!" Said to be easy to use and to take just minutes to apply, the user "will look years younger instantly and feel great." Secret Lift, a Kit including Firming Gel, Fade Away Freckles **Cream** and **Facial** Cleanser, features "special small hypo-allergenic **tape** (that) adheres unnoticeably with concealed elastic band, lifting sagging skin,

eliminating wrinkles from face, eye area, neck and jawline." The Fade Away cream is claimed to lighten darkened pigmentation age spots, blotches and ugly skin discolorations on hands, face and arms, and is "fortified with SPF to protect against further darkening." Two formulas are offered, one for Light (Blond, Gray, White) Hair and one for Dark (Black, Brown, Auburn) Hair. Hidden weapon

In 1889, a widowed mother named Margaret Kroesen began selling the homemade **adhesive** patches she had been applying at night to reduce her forehead frown lines, and a beauty secret was born. In addition to Russo, **Frownies** fans have included Ursula Andress and supermodel Dayle Haddon. The sticky strips can be found at drugstores, by calling 800-648-6891, or through [www.frownies.com](http://www.frownies.com)...

Fashion Update: Cosmetic detail

Independent (IN) - Thursday, April 15, 1993

By: ROGER TREDRE and TAMSIN BLANCHARD

Edition: 3 Section: Fashion Page Page: 14

Word Count: 122

TEXT:

SOME beauty products take a while to catch on. **Frownies**, small **adhesive** patches that claim to smooth out frown lines, have reached Britain a mere 95 years after they were first launched in the United States. You stick the diamond-shaped patches on your forehead overnight and, within two or three weeks, "minor" frown lines should start to disappear. The press blurb talks very impressively about the "re-education of the facial muscles." Be warned: if you wear them at work, you will get some strange looks indeed from your colleagues. The customer inquiry telephone number, which is already receiving 50 calls a day, is 071-734 5354. A 92-piece pack costs pounds 8.95. It's got to be worth a try.

**Inventor:** MATSUI HIDEKI

**Applicant:** FREESIA KK

**Application No.:** 2003-108488 [JP 2003108488]

**Filed:** April 11, 2003 (20030411)

**ABSTRACT**

PROBLEM TO BE SOLVED: To provide a stretch **tape** that is applied to the circumference of wrinkles and fixed in a state of stretching the wrinkles by stretching the wrinkles from the circumference thereof and a **beauty** treatment using the stretch **tape**.

SOLUTION: The **beauty** treatment/**facelifting** stretch **tape** is applied to the surface of the skin and stretches and fixes wrinkles on the skin surface. The **tape** is made by thickly applying an acrylic viscous material of at least 35 g/m2 to a base material made of an urethane nonwoven fabric and is 15 to 50 mm in width and length. The end of the **tape** that stretches the skin is rounded. The **beauty** treatment/**facelifting** method applies the **tape** to the circumference of the wrinkles in the skin around the eyes, on the **eyelids**, the **cheek** or the like in a state of stretching the wrinkles and applies a moisturizing/contracting **pack** to the circumferences and the entire **face** before sleeping and washes it away the next morning.

**Filed:** September 03, 1992 (19920903)

**ABSTRACT**

**PURPOSE:** To solve troubles such as a **wrinkle**, a stain, a dull color, a pimple, a ruddy face, and a fishskin disease of the **face**, a lean figure and the like by using a gold foil-laminated paper.

**CONSTITUTION:** A gold foil-laminated paper 1 for **beauty pack** is attached closely to the **face**, and a vinyl **mask** 2 is used to cover on the gold foil-laminated paper 1, and it is fixed at the rear side of the **face** by using a Velcro **tape** (R) 3. Besides a gold foil-laminated paper 5 is attached closely to a hand 7, a leg 8, and a trunk 9 from the outer side as a physical **beauty pack**, and they are fixed by using supporters 6.

**Alerting Abstract US A1**

**NOVELTY** - A **facial/neck patch** (10) or **mask** (12) comprises flexible patch or **mask** body formed from porous material; attachment mechanism connected to the patch or **mask** body for securely, removably attaching the patch or **mask** in contact with contoured facial and/or neck skin areas of the subject; and anti-aging effective compound provided in chemical communication with undersurface of the patch or **mask** body.

**DESCRIPTION** - **Facial/neck patch** or **mask** comprises flexible patch or **mask** body formed from porous material; attachment mechanism connected to the patch or **mask** body for securely, removably attaching the patch or **mask** in contact with contoured facial and/or neck skin

areas of the subject; and anti-aging effective compound provided in chemical communication with undersurface of the patch or **mask** body to effectuate delivery of the anti-aging compound to the contoured facial and/or neck skin area for a period of time. An INDEPENDENT CLAIM is also included for a method for treating facial and/or neck skin aging in mammal comprising applying facial/neck patch or **mask** to facial and/or neck skin area(s) in the subject, and removably securing the patch or **mask** to the facial and/or neck skin area(s) through attachment mechanism connected to the patch body.

ACTIVITY - None given.

MECHANISM OF ACTION - None given.

USE - For treatment of facial or neck skin aging in mammal (claimed).

ADVANTAGE - The invention prevents or alleviates the symptoms of skin aging in the facial and/or neck skin.

DESCRIPTION OF DRAWINGS - The figure is a perspective view of a human female subject wearing a variety of facial and neck patches and **mask**.

10 Patch

12 **Mask**

24, 26 Orbital patch or **mask**

46 Infraorbital margin

90 Labial skin patch

**Technology Focus PHARMACEUTICALS** - Preferred Component: The flexible patch or **mask** body is sized and dimensioned to conform to contoured **facial** and/or neck skin area(s) of the subject from orbital margin, nasal skin area, labial margin, mandibular, maxillary, or temporal lateral **facial** skin area, chin, jaw, and/or neck skin area. The **facial** or neck or **mask** conforms and stretches in conjunction with normal **facial** and neck skin movements as occur during jaw flexure, head turning, and eye opening and closure. The patch or **mask** body is constructed for expansion and/or elastic flexure in all directions planar to under surface of the patch or **mask** that is applied to **facial** or neck skin area to be treated. The attachment mechanism is a tie; elastic or other manual closure mechanism that attaches to opposing lateral margins of the patch or **mask** and encircles a head of the subject; mounting element(s) attached to opposing margins of the patch or **mask** and adapted for engaging an ear or other securely engageable anatomical feature of the subject's **face**; and/or adhesive gel, strips, **tape**, or other adhesive mechanism connected to undersurface of the patch or **mask** or interposable between the undersurface of the patch or **mask** and skin surface area. The **facial/neck** patch or **mask** further includes orbital patch or **mask** (24, 26) sized and dimensioned to conform to orbital margin of the subject for treatment of periorbital skin aging in the subject, nasal skin patch or **mask** sized and dimensioned to conform to nasal skin surface, labial skin patch (90) or **mask** sized and dimensioned to conform to labial margin, and neck skin patch or **mask** sized and dimensioned to conform to neck skin surface. The patch or **mask** comprises conforms to portions of the orbital margin of the subject from supraorbital margin, infraorbital margin (46), lateral orbital, and/or medial orbital margin of the eye. The symptoms of **facial** and/or skin neck skin aging includes degeneration of the microvascular system; flaccidity and development of wrinkles due to decrease in and/or crosslinking collagen... ..in the epidermis associated with cellular atypia, atrophics, and loss of polarity; and/or local hyper- and hypopigmentation and/or abnormal pigmentation. The patch or **mask** body, or its undersurface portion serves as a substrate or reservoir for receiving and retaining the anti-aging effective compound... ..Preferred Condition: The **facial/neck** patch or **mask** provides controlled, time-release delivery of anti-aging compound for prolonged delivery time period of 1-4 hours, 4-8 hours, or more than 8 hours to effectively prevent or reverse symptoms of **facial** skin aging in the subject.

**Extension Abstract ADMINISTRATION** - The treatment of facial and/or neck skin aging in mammal includes applying facial/neck patch or **mask** to facial and/or neck skin area(s) in the subject, and removably securing the patch or **mask** to the facial and/or neck skin area(s).

**Original Abstracts:** ...methods are provided for preventing and treating facial and neck skin aging in mammalian subjects. A partial or complete facial or neck skin patch or **mask** includes a flexible **patch** or **mask** body formed of a porous material that is sized and dimensioned to conform to one or more contoured facial and/or neck skin areas of the subject. Adhesive or other attachment means connect the patch or **mask** body in contact with one or more contoured facial and/or neck skin areas of the subject. At least one anti-aging effective compounds, such as CoQ10, is applied to or otherwise provided in chemical communication with an undersurface of the patch or **mask** body to effectuate delivery of the **anti-aging** compound to the contoured facial and/or neck skin area, in an effective amount and for an extended period of time effective to prevent or alleviate symptoms of skin aging in the facial and/or neck skin area to which the patch or **mask** is applied. ...

**Claims:** I claim:1. A facial or neck patch or **mask** for treatment of facial or neck skin aging in a mammalian subject comprising: a flexible patch or **mask** body formed of a porous material, said patch body sized and dimensioned to conform to a facial or neck skin area of said subject ;attachment means connected to the patch or **mask** body for securely, removably attaching the patch or **mask** in contact with one or more contoured facial and/or neck skin areas of the subject; at least one anti-aging effective compound provided in chemical communication with an undersurface of the patch or **mask** body to effectuate delivery of the anti-aging compound to the contoured facial and/or neck skin area in an effective amount, and for an effective period of time, to prevent or alleviate symptoms of skin aging in the facial and/or neck skin area to which the patch or **mask** is applied.

**Impregnated cloth tape for the treatment of wrinkles - contains a treatment esp. plaster which is applied to the skin after dipping the cloth in water or a lotion**

Patent Assignee: CAUX J B A E (CAUX-I)

Patent Family ( 1 patents, 1 countries )

Patent Number	Kind	Date	Update	Type
FR 2326910	A	19770610	197728	B

Local Applications (no., kind, date): FR 197530867 A 19751008

**Alerting Abstract FR A**

A roll of cloth **tape** is impregnated with a substrate pref. plaster is for the treatment of **wrinkled skin**. A length of the **tape** is dipped in water, or a curative **lotion**, applied smoothly to the **face**, and left to dry and harden. It sticks to the skin as it dries and can be worn for several hours.

The **tape** is as easy to apply as sticking plaster, and as easy to remove. Several layers of similar, or different **tapes** can be superimposed in a single treatment. Application is a substitute for **face packs** and **face masks**.

**Alerting Abstract US A1**

**NOVELTY** - A patch comprises a single matrix layer formed of a **bioadhesive** water-sensitive polymer, a water soluble oligomer, a surfactant and at least one cosmetic, dermatological or pharmaceutical ingredient.

**DESCRIPTION** - **INDEPENDENT CLAIMS** are also included for:

treatment of the skin involving applying the patch to a surface of the skin;  
adhering a patch into the skin, hair follicles or sebaceous glands involving wetting an area of the skin, hair follicles or sebaceous glands; and affixing the patch to the skin, hair follicles or sebaceous glands; and

an article for application to the skin comprising the patch.

**USE** - For controlled topical or transdermal delivery of cosmetic, dermatological or pharmaceutical ingredient (e.g. keratolytic agent, antiinflammatory agent, sunscreen and **moisturizer**, anti-acne and antifungal) into the skin, **hair** follicles or subcutaneous glands (claimed).

**ADVANTAGE** - The patch comprises a rate controlling matrix layer. The **adhesive** properties of the patch maintains the patch **in** place on the skin, while allowing the patch to be readily removed without causing skin irritation or leaving **adhesive** residue on the skin. The patch is **aesthetically** pleasing, more comfortable and less obstructive.

**Technology Focus** ...pharmaceutical ingredients are antioxidant, free radical scavenger, moisturizer, de-pigmentation agent, liporegulator, reflectant, humectant, antimicrobial agent, allergy inhibitor, anti-acne agent, anti-aging agent, anti-**wrinkling** agent, antiseptic agent, analgesic, antitussive, antipruritic, local anesthetic, anti-hair loss agent, hair growth promoting agent, hair growth inhibitor agent, anti-dandruff agent, antihistamine, keratolytic agent, antiinflammatory agent...

**Alerting Abstract WO A1**

**NOVELTY** - The invention relates to an anti-**wrinkle** and anti-circle grimacing rectifier, comprising laminar segments having different shapes and sizes, exhibiting **adhesive** and non-transpiring characteristics, which are preferably made of natural rubber, latex or a similar material and that are applied on and adapt to the structure of the **face** and the features of the user. Said laminar segments may have various formats so that they may be applied on the forehead (1), cheeks, cheekbones (2), lips (3), the pectoral region or other parts of the body. Two or more segments may be integral with one another with the aim of forming a glove-like bag and may include gems or other decorative elements. Said rectifier can also have a configuration resembling a **mask** and include corresponding holes

for the eyes, nose and mouth or a shape similar to that of a pair of eyeglasses, the inner space for the eyes remaining empty of including glass lenses.

USE - Anti-**wrinkle** and anti-circle grimacing rectifier **mask** using **adhesive** non-transpiring portions shaped to face contours

DESCRIPTION OF DRAWINGS - 1 Forehead

2 Cheekbones

3 Lips

6 Eyeglasses

Priority Applications (no., kind, date): JP 1999282991 A 19991004

#### Alerting Abstract JP A

NOVELTY - A **wrinkle** removing **adhesive** sheet (1) has an expandable cloth (2) made of expandable thread as warp, adhered on model paper (4) through **adhesive** layer (3). Several rectangular strips (10) are formed on surface of the cloth and punch profile lines (9) are formed on cloth to enable easy removal of strips (10). Fats and **oils** of structure differing from **adhesive** resin are contained for softening **adhesive**.

DESCRIPTION - A **wrinkle** removing **adhesive** sheet (1) has an expandable cloth (2) made of expandable thread as warp which could be extended in longitudinal direction, adhered on a model paper (4) through an **adhesive** layer (3). Several rectangular strips (10) are formed on surface of the cloth and punch profile lines (9) are formed on cloth to enable easy removal of **adhesive** strips. Fats and **oils** of structure different from **adhesive** resin contained in it softens the **adhesive**.

USE - For removing **wrinkles** in face.

ADVANTAGE - The fats and **oils** contained in **adhesive** softens the **adhesive** and enables the peeling of **wrinkle** removing sheet easier. Longitudinal cleavage lines formed in center of strips enables easy adhesion of the **adhesive** strip to spherical surface of face and curved surfaces around eyes. The circulation of lymph is activated, as the epithelium is drawn closer by the **adhesive** sheet. Water and nutrients are supplied to the epithelial cells at the **wrinkle** portion and **wrinkles** are removed effectively. As the **wrinkle** removing sheet is compact, it can be carried and used anywhere.

DESCRIPTION OF DRAWINGS - The figure shows sectional drawing of a **wrinkle** removing **adhesive** sheet.

1 **Wrinkle** removing **adhesive** sheet

2 Expandable cloth

3 **Adhesive** layer

4 Model paper

9 Punch profile line

10 Rectangular **adhesive** strips

**Technology Focus** POLYMERS - Preferred Structure: Preferably, longitudinal cleavage lines are formed on vertical direction of rectangular strips along its center. Preferred Composition: The **adhesive** contains essentially of acrylic type synthetic resin. The fat and **oil** contained in **adhesive** is 0.2-6 weight% (wt.%) of silicone **oil**. The **adhesive** layer contains one or more of vitamin, **moisturizer** or fragrance.

**Wrinkle deterring apparatus for women's cleavage**

Patent Assignee: KILLEN C L (KILL-I)

Inventor: KILLEN C L

Patent Family ( 1 patents, 1 countries )

Patent Number	Kind	Date	Update	Type
US 5961986	A	19991005	199948	B

Local Applications (no., kind, date): US 1996608462 A 19960228

Priority Applications (no., kind, date): US 1996608462 A 19960228

**Alerting Abstract US A**

NOVELTY - A pressure sensitive **adhesive** is applied over the entire skin side of the substrate. The apparatus (11) has an unformed, flat shape until applied to conform to a person's skin. The substrate is made of an open weave or closed weave synthetic or natural fiber material, or foam. The apparatus should be applied at and above the breast cleavage as well as the immediately adjacent inside portions of the breasts. It may be substantially heart shaped.

DESCRIPTION - The **adhesive** is impregnated with a medication such as a skin **moisturizer** or decongestant. When the apparatus is bonded to the person's chest, the medication permeates into the skin.

USE - To deter skin folding, **wrinkling** on a woman's skin while sleeping. It can be applied on the person's back between the shoulder blades and above the knee area.

ADVANTAGE - It significantly reduces skin **wrinkling** within the applied skin area. .

DESCRIPTION OF DRAWINGS - The drawing shows a perspective view of the apparatus.

11 Anti **wrinkling** apparatus

**Original Abstracts:** The preferred embodiment of an anti-**wrinkling** apparatus employs a **substrate** with an adhesive for securing the apparatus to the user's skin for deterring skin folding and, thus, **wrinkles**. In another aspect of the present invention, the substrate has a substantially heart shape. In a further aspect of the present invention, the apparatus does not have a preformed shape and is flat prior to use. In yet another aspect of the present invention, the anti-**wrinkling** device of the **present** invention is applied between the breasts. In still another aspect of the present invention anti-**wrinkling** apparatus, multiple stacked **adhesive** and liner layers, as well as a substrate layer, are provided for allowing repeated application and removal.

**Claims:** An apparatus for deterring **wrinkles** of a person's skin between and above a person's breast, said apparatus comprising: a first substrate being unformed and substantially flat prior to application on...

#### Alerting Abstract WO A1

A transdermal or intradermal delivery device for topical application of a cosmetic prepn. comprises a backing substrate carrying a matrix contg. at least one active ingredient (A), for improving the appearance and/or feel of the skin, and an **adhesive** (B) suitable for facial skin use. (A) is, e.g., an antioxidant, **moisturiser** or marine extract.

The matrix is contacted by a release liner. The device has a shape adapted for a target area selected from the upper lip, naso-labial fold area, lower forehead, front portion of the neck, outer corners of the eyes, under the eyes and back of the hands. Also claimed is a method for improving the appearance of ageing, photo-damaged or oxidatively stressed skin, by applying the device to at least one facial or hand target area.

USE - The treatment makes the appearance of **wrinkling** of the skin less apparent, and also lessens or slows other outward indications of skin damage (e.g., mottling, loss of elasticity, spots, dryness or leatheriness) due to e.g., ageing, sunlight or UV.

ADVANTAGE - With the transdermal or intradermal device (i.e. a patch), application is passive and (A) can be delivered continuously for up to 24 hrs. or even longer.

Evaporative loss of solvents and/or active ingredients is minimal, even if a non-occlusive patch is used.

**Documentation Abstract** ...for topical application of a cosmetic prepn. comprises a backing substrate carrying a matrix contg. at least one active ingredient (A), e.g., an antioxidant, **moisturiser** or marine extract, for improving the appearance and/or feel of the skin, and an **adhesive** (B) suitable for facial skin use... USE - The treatment makes the appearance of **wrinkling** of the skin less apparent, and also lessens or slows other outward indications of skin damage (e.g., mottling, loss of elasticity, spots, dryness or... B) is a pressure-sensitive **adhesive**, pref. of silicone or acrylic type... EXAMPLE - 50 pts. (as dry wt.) of medical grade acrylic pressure-sensitive **adhesive**, dissolved in **ethyl acetate/toluene**, was mixed with 50 pts. of ascorbic acid/Na ascorbate mixt. (wt. ratio 1:22; both as dry powders). The obtd. cosmetically effective **adhesive** matrix was **cured** at 250(deg)F. The matrix material was coated as a 4.6 mil thick layer onto a release liner and a backing substrate laminate was applied to give a transdermal patch. In use, the patch ameliorated the appearance of **wrinkling** near the **outer** corners of the eye of a test subject. (KKG)

**Original Abstracts:** Skin care compositions and methods are provided for improving the appearance of skin affected by aging, photodamage and/or oxidative stress. Specifically, **adhesive** materials containing cosmetically **active** ingredients, e.g., one or more antioxidants such as Vitamins A, C and/or E, or **moisturizers** are applied to **target** areas including the frowline area of the forehead, the front of the neck, the crows-feet area near the eyes, the upper lip and the... Skin care compositions and methods are provided for improving the appearance of skin affected by aging, photodamage and/or oxidative stress. **Pressure sensitive adhesive patch to remove wrinkles from skin - is stiff enough to hold skin area tensioned under patch**

Patent Assignee: PERE-LAHAILLE J (PERE-I)

Inventor: PERELAHAI J

Patent Family ( 1 patents, 1 countries )

Patent Number	Kind	Date	Update	Type
FR 2512651	A	19830318	198316	B

Local Applications (no., kind, date): FR 198112410 A 19810624

**Alerting Abstract FR A**

An **adhesive** patch for applying to a **wrinkled** area of skin in order to eliminate or reduce the **wrinkles**. The patch is sufficiently rigid to flatten the covered area of the skin, holding it stretched and free from **wrinkles**. The patch should be flexible enough to conform to the profile of the covered area while retaining its potential to stretch out the **wrinkles**.

The patch is used to reduce or eliminate **wrinkles** from an area of skin, partic. on the face. The patch is much more effective than **creams**, **lotions**, mud **packs** etc. which have previously been tried. The patch can be made decorative and worn night and day until a **wrinkle** is smoothed out.

#### Alerting Abstract FR A1

NOVELTY - A composite structure, comprising at least one **adhesive** matrix based on a permanent adhesive between two support layers, one of which at least is permeable to a solvent, is new. The matrix contains at least one active substance soluble in the solvent and optionally a filler. When the structure is wetted by the solvent the active substance diffuses towards the surface.

DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

production of the novel structure; and

a stack of the novel structures in which the structures are adhered one to the other and provided with a means by which the user may peel them off.

USE - The structure is used for such purposes as patches, disks or serviettes used for treatment, makeup or cleansing of the skin and hair. The matrix may serve as a reservoir of active substances during repeated wettings. (All claimed.)

ADVANTAGE - Preservation of the active substance is improved, since they can be kept in a dry state until the moment of use. The structure may incorporate active substances which should not be mixed until the moment of use.

**Technology Focus** ...the matrix. At least one is hydrosoluble. They may be vitamins A, C or F, glycerin, laponite, surfactants, collagen, salicylic acid, thioacid, caffeine, essential aromatic oils, colorants, anti-oxidants, anti-free radicals, hydrators, depigmenters, liporegulator, anti- acne agents, anti-seborrheics, anti-aging agents, softeners, anti-wrinkle agents, keratolitics, anti-inflammatories, refreshers, healing

promoters, vascular protectors, anti-bacterials, anti-fungals, anti-perspirants, deodorants, skin conditioners, local anesthetics, immunomodulators and nutrients. They may... . **Preferred Adhesive:** The adhesive is vinyl, polyvinylacetate (PVA) or polyvinylpyrrolidone (PVP), pseudolatex, acrylic polymer, polyurethane or elastomer latex based... . **Preferred Structure Variations:** The structure may comprise two juxtaposed or **superposed** adhesive **matrices** of the same or different composition adhered to one another and containing the same or different active substances. Preferred forms are... . a support **layer**, adhesive matrix, second support and **second** matrix, optionally covered by a removable protective film; a support, a matrix, a second support, a second matrix and a third support, the second ...

#### Alerting Abstract CA A1

NOVELTY - A cosmetic dual patch comprises:

a static magnet layer; and

a non-woven, transdermal, hydrogel or silicone sheeting patch carrying a cosmetically beneficial agent (I).

Layers (a) and (b) are adhesively bound to each other.

DESCRIPTION - An INDEPENDENT CLAIM is included for a cosmetic skin treatment method, involving applying to the skin both the south pole of a static magnet and a care composition comprising (I) in a vehicle.

ACTIVITY - Dermatological.

MECHANISM OF ACTION - Keratinocyte growth stimulant. In tests for stimulation of pig epidermal cell proliferation using lactic acid (LA) and the South pole of a Bioflex (RTM) magnet (having magnetic force 700-750 Gauss at the edges and 280-300 Gauss at the middle of the bar), the degree of proliferation (relative to 100% for a control without LA or magnet) was 143% using 2 mM LA alone, 187% using magnet and 265% using magnet plus 2 mM LA.

USE - For skin care. The static magnetic fields stimulate keratinocyte growth, and can decrease the number of skin folds, increase the firmness and moisture level of the skin and provide a treatment for cellulite. The patches also deliver (I), specifically one or more of hydroxyacids (which enhance proliferation and increase ceramide biosynthesis in keratinocytes, increase epidermal thickness and increase desquamation of normal skin, resulting in smoother, younger-looking skin), retinoids (which enhance keratinocyte proliferation in vitro, increase epidermal thickness and increase collagen synthesis by dermal fibroblasts, resulting in protection of sun damage and smoothing of **wrinkled** skin), **vitamin C**, phytic acid (as anti-irritant) and kojic acid or yohimbine (as skin depigmenting agents).

ADVANTAGE - The magnetic field enhances the effect of (I). The magnetic field and (I) may have a synergistic beneficial effect on skin, e.g. in stimulating keratinocyte proliferation.

**Extension Abstract** ...in either order) or concurrently for a period of time from minutes to hours. (I) may be used e.g. in the form of a **lotion, cream** or aerosol, as well as in a patch as described... ... **EXAMPLE** - A non-woven patch comprised (i) a magnetic sheet (South side down), (ii) an acrylic **adhesive** layer, (iii) a non-woven impregnated with an **adhesive**/active agent composition comprising 80% **Gantrez S-97** (RTM; anionic polymer), 2% amino-methyl-propanol, 6% lactic acid, 0.2% preservative and water to 100% and optionally (iv) a pressure-sensitive **adhesive** layer.
